

#### Features:

- Universal AC input / Full range
- Built-in active PFC function, PF>0.95
- High efficiency up to 89%
- Withstand 300VAC surge input for 5 seconds
- Protections: Short circuit / Overload / Over voltage / Over temperature
- · Cooling by free air convection
- Built-in constant current limiting circuit
- 1U low profile 38mm
- Built-in remote ON-OFF control
- Standby 5V@0.3A
- · Built-in remote sense function
- No load power consumption<0.5W
- 5 years warranty

- 5. Derating may be needed under low input voltages. Please check the derating curve for more details.

# **■** Function Description of CN100

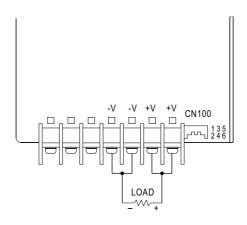

| Pin No. | Function | Description   |
|---------|----------|---|
| 1       | RC+      | Turns the output on and off by electrical or dry contact between pin 2 (RC-). Short: Power OFF, Open: Power ON.   |
| 2       | RC-      | Remote control ground.  |
| 3       |          | Auxiliary voltage output, 4.6~5.25V, reference to pin 4(AUXG). The maximum load current is 0.3A. This output has the built-in oring diodes and is not controlled by the "remote ON/OFF control".                      |
| 4       | AUXG     | Auxiliary voltage output ground. The signal return is isolated from the output terminals (+V & -V).   |
| 5       | +S       | Positive sensing. The +S signal should be connected to the positive terminal of the load. The +S and -S leads should be twisted in pair to minimize noise pick-up effect. The maximum line drop compensation is 0.5V. |
| 6       |          | Negative sensing. The -S signal should be connected to the negative terminal of the load. The -S and +S leads should be twisted in pair to minimize noise pick-up effect. The maximum line drop compensation is 0.5V. |

# **■** Function Manual

# 1.Remote Control

The PSU can be turned ON/OFF by using the "Remote ON/OFF" function

| Between RC-(pin2) and RC+(pin1) | Output Status |  |  |
|---------------------------------|---------------|--|--|
| SW ON (Short)                   | OFF           |  |  |
| SW OFF (Open)                   | ON            |  |  |

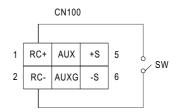

Fig 1.1

### 2.Remote Sense

The remote sensing compensates voltage drop on the load wiring up to 0.5V.

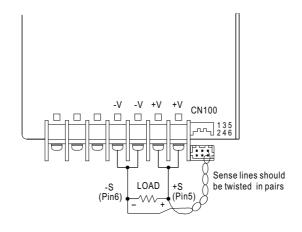

Fig 2.1
